

Clark Forklift

Clark Forklift Forklift Training - Performing worldwide, there are at this time 350,000 Clark forklifts and lift trucks in operation, with more than 250,000 of those in use in North America. Clark has five major lines of lift trucks across the globe, making it one of the most expansive organizations in the industry. Heavy duty vehicles ranging from 1,500lb to 18,000lb capacities, dual fuel, gasoline, LPG, hand powered trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift, handles more than 120,000 specialized components intended for 20 exclusive brands of forklifts and automated equipment. Your local Clark Seller is your complete source for availability of all your parts needs provided by Clark Totalift.

Clark's extraordinary Parts Distribution Centers are conveniently situated in Louisville, Kentucky, which serves both their customers and dealers in North America, and Changwon, South Korea, which handles their Asian sellers and consumers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing companies. Motivated to offer the highest level of value and service to our users, Clark remains on the cutting edge when it comes to enhancing efficiency and benefiting performance.

Clark Totalift has a very impressive international support network. With over 550 locations globally, supplier representation in over 80 nations and 230 locations in North America, their high level of commitment to their clients predominates the materials handling industry.

By pioneering the operator restraint system protection feature, Clark proudly remains a leader of innovation in the industrial equipment and automated lift truck industry. This exceptional dedication to safety is at this time a customary feature on every lift truck.

Clark has a continual mission to possess the No. 1 quality system in the industry which is demonstrated by their commitment to ISO standards. Clark, is the first manufacturer of forklifts and lift trucks to be internationally certified with quality standard ISO 9001 in all of its production plants. Additionally, the ISO 14001 Environmental Conservancy System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement enables Clark to be ready for any environmental limitations, thus placing them in a dominant industry position.

Resource Efficient Manufacturing

Clark has selected the structure of "Lean Production" at all of its assembly plants because this technique is particularly economical and permits minimal use of resources. Developed to ensure maximum proficiency, this system is intended to find and acknowledge the most efficient ways for manufacturing plant management. Clark has completed this transition of its Korean plant. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and production efficiencies.

Engineering

By working together, Clark's product suppliers and engineers communicate towards enhancing product proficiency while minimizing costs. The new value engineering agenda combines progressive product development and delivers superior customer support and service within the industry.
